RUSSELLVILLE | CO PENDING CONFIRMATIONS

Updated 10 November 2026 | Consolidated follow-up from MORE / P4M cross-plant discussions

31 open validation items | 20 high priority | 6 topic groups | All questions and actions in English

Working register only: a cross-plant issue is NOT automatically an established Russellville gap. Confirm current business practice with Chris and Hayden and request Template confirmation where required.

Immediate due item: confirm intra-company operating responsibilities with Chris and Hayden before 17 November 2026. All other timing remains unconfirmed unless separately agreed.

Technical note: valuation class, price control (S/V), and the material master Do Not Cost indicator must be validated as distinct concepts. Romania G760 is an unverified reference pending sample material details.

TOPIC GROUP	ITEMS	HIGH PRIORITY	EXAMPLES OF QUESTIONS
Inventory & Material Costing	8	6	Spare parts, tooling, Y301/G760, valuation, budgets and stock reconciliation
Manufacturing & Product Costing	3	3	REM + discrete, cost collectors/production orders, batch management
Production & Scrap	4	3	Production closure, scrap execution/approvals and reporting, Z alternatives
Cost Center Structure	3	2	Overhead cost centers, pools, labels and allocation model
Projects & Investment	7	4	WBS/prototypes, improvement budgets, PDP/SPP, e-compressor projects
Governance & Ownership	6	2	Intercompany ownership, MTG, mass approvals, SoD, common findings

Core meeting approach: one consolidated validation session, with separate local business and Template questions. Use the Excel workbook for owner, status, decisions, evidence and follow-up.

INVENTORY & MATERIAL COSTING | 8 PENDING TOPICS

Each item records what must be confirmed; it is not an approved system change or a proven Russellville requirement.

ID / PRIORITY	DISCUSSION TOPIC	CONFIRMATION QUESTION	OWNER / APPLICABILITY	NEXT ACTION / STATUS
RUS-CO-06 High	Spare-parts accounting treatment	Does Russellville carry spare parts as valuated inventory on the balance sheet, or expense them periodically? What amounts and account assignments are involved?	Local: Chris / Hayden Template: MM + FI/CO Template RUS: Russellville: confirm locally	Confirm accounting policy; obtain material/family, stock and G/L examples. Status: Pending business
RUS-CO-07 High	Operating supplies and consumable tooling	Are operating supplies, fixtures and consumable tooling carried as valuated inventory or expensed? Which material families, stock values and G/L accounts apply?	Local: Chris / Hayden Template: MM + FI/CO Template RUS: Russellville: confirm locally	Request material and warehouse examples, valuation classes and stock value by category. Status: Pending business
RUS-CO-08 High	Y301, G760 and Do Not Cost configuration	For relevant Y301 materials, which valuation class is used and is the material master Do Not Cost indicator set? Can the Romania G760 example be reused if costing is needed?	Local: Chris / Hayden Template: MM + CO Template RUS: Cross-plant / template; RUS unconfirmed	Request Romania material number and plant; compare material master costing view, valuation class and costing behavior. Status: Pending template
RUS-CO-09 High	Price control S or V	Do spare parts and operating supplies use Standard Price (S) or Moving Average Price (V) today, and what price-control method is planned in P4M?	Local: Chris / Hayden Template: MM + CO Template RUS: Russellville: confirm locally	Validate price control and price determination on representative materials. Status: Pending business
RUS-CO-10 Medium	Material family and condition classification	Which material families and valuation classes apply to spare parts, including new, refurbished and defective conditions?	Local: Chris / Hayden Template: MM + CO Template RUS: Russellville: confirm locally	Share material-family / valuation-class table and ask business to validate examples. Status: Pending business
RUS-CO-11 Low	ABC category reporting	Is separate A/B/C classification reporting required for operating supplies and spare parts? Can Fiori reports deliver the required segmentation?	Local: Chris / Hayden Template: MM + Reporting Template RUS: Cross-plant / template; RUS unconfirmed	Separate from mandatory inventory valuation gap; confirm business reporting need. Status: Pending template
RUS-CO-12 High	Budget and plan upload by materials	If material categories share a G/L account, how will plan/budget values be entered and actual-versus-budget analysis produced by category?	Local: Chris / Hayden Template: CO Planning + Fiori Template RUS: Cross-plant / template; RUS unconfirmed	Ask Template Q&A to demonstrate budget upload and reporting by material family or classification. Status: Pending template
RUS-CO-13 High	Inventory cutover and balance reconciliation	Would changing the valuation of spare parts / supplies affect inventory values, stock positions and balance-sheet reconciliation for Russellville?	Local: Chris / Hayden Template: MM Migration + FI/CO RUS: Russellville: confirm locally	Quantify affected stock balances and agree migration/reconciliation approach after valuation decision. Status: Pending business

MANUFACTURING & PRODUCT COSTING | 3 PENDING TOPICS

Each item records what must be confirmed; it is not an approved system change or a proven Russellville requirement.

ID / PRIORITY	DISCUSSION TOPIC	CONFIRMATION QUESTION	OWNER / APPLICABILITY	NEXT ACTION / STATUS
RUS-CO-22 High	Mixed manufacturing: REM and discrete	Can a single plant support repetitive manufacturing for one product line and discrete manufacturing for others? Which process applies to Russellville?	Local: Chris / Hayden + Production Template: PP + CO Template RUS: Reference from another plant; RUS unconfirmed	Confirm manufacturing strategy per product family and request a cross-module process/costing demonstration. Status: Pending template
RUS-CO-23 High	Product Cost Collectors alongside production orders	How will P4M handle Product Cost Collectors (REM) and production orders (discrete) simultaneously, including WIP, variance analysis and period-end settlement?	Local: Production + Russellville Controller Template: PP + CO Product Costing RUS: Cross-plant / template; RUS unconfirmed	Request end-to-end example for both scenarios and a documented month-end close responsibility matrix. Status: Pending template
RUS-CO-24 High	Mixed batch-managed and non-batch-managed materials	What are the implications of batch-managed and non-batch-managed material/product lines in the same plant for production postings, traceability and CO costing?	Local: Chris / Hayden + PP / Quality Template: PP + MM + CO Template RUS: Other-plant case; RUS unconfirmed	Identify material/plant scenarios and validate integration and costing with PP/MM Template. Status: Pending template

PRODUCTION & SCRAP | 4 PENDING TOPICS

Each item records what must be confirmed; it is not an approved system change or a proven Russellville requirement.

ID / PRIORITY	DISCUSSION TOPIC	CONFIRMATION QUESTION	OWNER / APPLICABILITY	NEXT ACTION / STATUS
RUS-CO-15 High	Production order close vs. settlement	Who sets delivery/technical closure statuses on production orders, and who performs CO settlement and period-end activities in P4M?	Local: Chris / Hayden Template: PP + CO Template RUS: Cross-plant / template; RUS unconfirmed	Map PP operational ownership versus CO settlement; confirm whether any local task shifts to Controller. Status: Pending template
RUS-CO-19 High	Scrap transaction execution vs CO monitoring	Who initiates/posts operational scrap, who approves the cost impact and who monitors scrap in CO under P4M?	Local: Chris / Hayden + PP / Logistics Template: PP + MM + CO Template RUS: Cross-plant reference; RUS to validate	Clarify RACI and posting flow, cost center account assignment and control points. Status: Pending joint
RUS-CO-20 High	Weekly/monthly scrap reporting and approvals	Can standard P4M/Fiori reporting show scrap quantity, USD value, material, cost center, approver and transaction detail for weekly/monthly management reporting?	Local: Chris / Hayden + Plant Quality Template: CO + PP + Fiori Reporting RUS: Cross-plant reference; RUS to validate	Collect a sample scrap report, required fields and approval history; request Fiori demonstration. Status: Pending template
RUS-CO-21 Medium	Replacement of existing Z transactions	Which custom Z-transaction functions are business-critical and what combination of P4M standard transactions or Fiori apps could replace them?	Local: Chris / Hayden + Key Users Template: Functional Template + IT RUS: Plant-specific inventory pending	Inventory existing Z reports (especially scrap), map functions and gaps, and demo standard alternatives. Status: Pending joint

COST CENTER STRUCTURE | 3 PENDING TOPICS

Each item records what must be confirmed; it is not an approved system change or a proven Russellville requirement.

ID / PRIORITY	DISCUSSION TOPIC	CONFIRMATION QUESTION	OWNER / APPLICABILITY	NEXT ACTION / STATUS
RUS-CO-25 High	Material overhead vs production overhead cost centers	Does Russellville currently use one material-overhead cost center and one production-overhead cost center? How does the MORE cost center hierarchy split these?	Local: Chris / Hayden + Controller Template: CO-OM Template / York RUS: St. Johns reference; RUS needs local validation	Review draft hierarchy and current cost center list; map overhead ownership and propose target structure. Status: Pending joint
RUS-CO-26 High	Production and pool cost centers	Which production cost centers and pool cost centers are expected in P4M, and what allocation/assessment cycles and activity rates are required?	Local: Chris / Hayden + Controller Template: CO-OM / CO-PC Template RUS: Cross-plant / template; RUS to validate	Review hierarchy first draft; request pool-cost-center model, sender/receiver rules and sample allocations. Status: Pending template
RUS-CO-27 Medium	Cost center hierarchy vs labels	Can cost center structures be validated on functional cost allocation requirements before locking label definitions, and how are mapping changes governed?	Local: Local Controller / Chris / Hayden Template: CO + Org Template / York RUS: Cross-plant / template; RUS to validate	Confirm sequence for hierarchy, labels, mappings, ownership and approval of changes. Status: Pending template

PROJECTS & INVESTMENT | 7 PENDING TOPICS

Each item records what must be confirmed; it is not an approved system change or a proven Russellville requirement.

ID / PRIORITY	DISCUSSION TOPIC	CONFIRMATION QUESTION	OWNER / APPLICABILITY	NEXT ACTION / STATUS
RUS-CO-02 High	Prototype project costing and billing	Are prototype engineering hours and expenses charged to dedicated WBS levels? Is customer invoicing recorded at another WBS level, or are prototype costs absorbed by the plant?	Local: Chris / Hayden Template: PS + CO Template RUS: Russellville: confirm locally	Obtain one real prototype example, including hours, material, tooling, settlement and billing. Status: Pending business
RUS-CO-03 High	Project planning and R&D engineering hours	How are projects planned? How are R&D engineer hours entered, valued and allocated to WBS elements, internal orders or cost centers?	Local: Chris / Hayden Template: PS + CO Template RUS: Russellville: confirm locally	Collect one planning example and one engineering-hours posting example. Status: Pending business
RUS-CO-04 High	Continuous improvement project budgets	How will plant improvement projects maintain budgets and actual costs in P4M if PM orders or Support Projects do not support the budget visibility required? Will open projects migrate?	Local: Chris / Hayden Template: PS + CO + PM Template RUS: Cross-plant / template; RUS unconfirmed	Request supported cost object, budget control method, reporting and migration approach. Status: Pending template
RUS-CO-05 Medium	Project definitions and cost object mapping	Which current project definitions, internal orders and cost centers must be aligned or mapped to the MORE / P4M structures?	Local: Chris / Hayden Template: CO + PS Template RUS: Russellville: confirm locally	Review sample project and internal order list; confirm target mappings. Status: Pending business
RUS-CO-28 Medium	E-compressor project: R&D or series production	Is the e-compressor activity already commercial/series production and therefore better classified as SPP rather than R&D/pre-development?	Local: Plant project lead / if relevant RUS Template: PS + CO Template RUS: Another plant; Russellville applicability unconfirmed	Ask Template Team to verify project classification criteria against actual production/commercial status. Status: Pending template
RUS-CO-29 High	One legacy project mapped to PDP and SPP	When a legacy project contains both pre-development and series-production activities, are two P4M P projects needed (PDP and SPP), and how are costs/budgets mapped?	Local: Chris / Hayden + Project Leads Template: PS + Migration + CO Template RUS: Cross-plant reference; RUS to validate	Confirm PDP/SPP definitions, mapping rules, cost assignment, migration and reporting responsibilities. Status: Pending template
RUS-CO-30 Medium	E-compressor purchased e-components / assembly costing	If electronic components are procured (Turkey was mentioned) and assembled locally, what material, interplant/intercompany and assembly costing flows apply?	Local: Plant Production / Procurement Template: MM + PP + CO Template RUS: Another plant; Russellville applicability unconfirmed	Confirm procurement/assembly flow and required cost-object postings before treating as a CO gap. Status: Pending joint

GOVERNANCE & OWNERSHIP | 6 PENDING TOPICS

Each item records what must be confirmed; it is not an approved system change or a proven Russellville requirement.

ID / PRIORITY	DISCUSSION TOPIC	CONFIRMATION QUESTION	OWNER / APPLICABILITY	NEXT ACTION / STATUS
RUS-CO-01 High	Intra-company process ownership	Does Russellville have interplant invoicing today? What changes in P4M, and will the Controller take over work currently performed by Logistics?	Local: Chris / Hayden Template: CO + Logistics Template RUS: Russellville: confirm locally	Document current vs. future process, responsible team, workload and any extra resources. Status: Pending business Due: Before 17 Nov 2026
RUS-CO-14 Medium	MTG ownership and material changes	Who will request, approve and maintain material master changes once direct MM01/MM02/MM06/MM17 access is restricted and MTG becomes mandatory?	Local: Chris / Hayden Template: Master Data Governance / MTG RUS: Russellville: confirm locally	Identify requestors/approvers and escalation route, especially for costing fields. Status: Pending business
RUS-XF-16 Medium	Mass approval of purchase requisitions	Can buyers/approvers release multiple purchase requisitions in one action under the standard P4M purchasing approval workflow?	Local: Purchasing lead Template: MM / Workflow Template RUS: Cross-plant / template; RUS unconfirmed	Request Template demonstration and confirm roles, release strategy and volume use case. Status: Pending template
RUS-CO-17 High	Segregation of duties (SoD) for purchase approvals	Are Controller PR approvals compatible with P4M segregation-of-duties rules? Which incompatible create/approve/post activities must be separated?	Local: Chris / Hayden + Local Purchasing Template: MM Workflow + Security/Audit RUS: Cross-functional; RUS controls to validate	Obtain the approved SoD role matrix and Controller approval responsibility; define mitigations if needed. Status: Pending template
RUS-XF-18 Medium	Mass PR approval ownership and DP involvement	Who owns mass-approval process design, and can Purchasing or the DP team execute operational tasks without shifting them to Controllers?	Local: Purchasing lead + Controller Template: MM Template + DP / Workflow RUS: Cross-functional / Russellville not verified	Identify process owner, approvers, operational support and standard-template mass-approval demo. Status: Pending joint
RUS-CO-31 Medium	Common vs plant-specific findings presented to York	Which cross-plant topics should stay common, and which require Russellville-specific evidence/decisions in the consolidated Finding List?	Local: Leticia / Chris / Hayden Template: Herbert + York / Template Leads RUS: Common template governance	Mark each candidate with applicability, owner, action, evidence and decision; review the combined list with York. Status: In progress

VALIDATION MEETING | RECOMMENDED AGENDA

Use a single combined meeting to obtain examples, demonstrate the template process and assign owners. The workbook includes full editable questions and tracking fields.

ORDER	DISCUSSION	ATTENDEES	EVIDENCE / QUESTIONS	TRACKER IDS
1	Governance	Russellville business: Chris / Hayden	Intra-company responsibility and resource model; share current process and invoicing owner.	RUS-CO-01
2	Projects	Chris / Hayden + PS/CO	Prototype WBS, engineering hours, internal orders, planning and billing; obtain representative examples.	RUS-CO-02 / 03 / 05
3	Projects	PS/PM/CO Template + Plant leads	Continuous improvement budget control, migration and cost object choice.	RUS-CO-04
4	Projects	PS/CO Template	Classify e-compressor as PDP, SPP or other; one-to-two P-project mapping; purchased-component flow.	RUS-CO-28 / 29 / 30
5	Material Valuation	Chris / Hayden + MM/CO	Spare parts, operating supplies and tooling: balance sheet vs expense; sample materials, stock values and G/Ls.	RUS-CO-06 / 07 / 13
6	Material Costing	Chris / Hayden + MM/CO Template	Y301, Romania G760 material number, Do Not Cost field, standard vs moving-average price, material family.	RUS-CO-08 / 09 / 10
7	Planning	CO Planning + Reporting Template	ABC reporting optional; actual vs budget by material class; how plan/budget data can be loaded.	RUS-CO-11 / 12
8	Manufacturing	PP/CO Template + Production	Repetitive + discrete within same plant; Product Cost Collectors, production orders, batch management, WIP/variance/settlement.	RUS-CO-22 / 23 / 24
9	Cost Centers	Russellville Controller + CO Template / York	Draft cost center hierarchy; material/production OH, pools, allocations and relation to labels.	RUS-CO-25 / 26 / 27
10	Production / Scrap	PP + CO + Fiori Reporting	Production order technical closure vs CO settlement; scrap posting roles, cost center approvals, reports.	RUS-CO-15 / 19 / 20
11	Master Data / IT	MDM/MTG + IT	Material maintenance ownership under MTG, Z-transaction inventory and standard replacements.	RUS-CO-14 / 21
12	Workflow / Audit	Purchasing + MM Template + Security/DP	Mass PR approval availability, Purchasing vs Controller vs DP ownership, SoD compliance.	RUS-XF-16 / RUS-CO-17 / RUS-XF-18
13	Final Review	Leticia / Herbert / York / Owners	Mark common vs Russellville-specific findings; capture owner, evidence, decision, due date.	RUS-CO-31
